

FCHS ALUMNI SPOTLIGHT

RISHABH KAPOOR

A current student at Stanford University, Rishabh is studying Molecular Biology and Education. While at FCHS, Rishabh was involved in HOSA and the Academic Team. His advice to current students is "High school is a time to explore: learn broadly, taking full advantage of both the core-curricular classes and the wonderful opportunities in the arts and at the CTC. Have a career or college goal in mind and let it inspire you, but never let it constrain you. Don't get bogged down thinking "will x extracurricular or y class help me achieve z?" Instead, let your interests and passions guide you—"z" will follow.

Finally, get involved. The FCHS family is as nurturing as it gets—but this is only because students and teachers take the time to engage with each other and the community."

Rishabh's favorite memories at FCHS:

Impossible to pick a single one:

- *Getting into hysterical fits of laughter over nerdy jokes in academic team practice instead of practicing.
- *Watching the cows' antics from the library window.
- *Celebrating Calculus Christmas with Ms. Parritt!
- *Being lovingly roasted by Mr. Hyatt every day in AP Euro.

CLASS OF 2017
